

Filti Face Mask Material Data Sheet

Filti's Face Mask Material is engineered using our patent-pending Nanofiber technology and is highly-efficient (up to 95%) on sub-micron particles, including bacteria and viruses.

Construction Details:

Filti Face Mask Material is constructed from polypropylene spunbond nonwoven with a Nanofiber fine filtration layer and surface layer of polyester nonwoven.

Style Number: 3-Layer lightweight composite
(NP097) filter media

Description: Polypropylene/Nanofiber/Polyester composite filter media

Finish: Sonic lamination

Material Comparison:

When compared, Filti Face Mask Material far exceeds standard cloth and fabric materials in efficiency percentage.

Polyester/Cotton Tights	2.50%
Polyester Dress Shirt	2.50%
Cotton Shirt	9.30%
Polyester/Cotton Sewing Fabric	10.40%
Microfiber Dish Towel	14.50%
Filti Face Mask Material	95.00%

* Results are the outcome of a single test on a TSI 8130 - they are not guaranteed to be representative of all Filti Mask Material.

Property	Target	Metric	Test Method
Weight	2.06 - 2.36 (70 - 80)	oz/yd ² (g/m ²)	ASTM D461
	n/a	lb (lbs/3000ft ²)	TAPPI 410
Air Permeability	28 - 35	ft ³ /min/ft ² (cfm) @ .5" H ₂ O	ASTM D 737 (U.S.)
	140 - 180	l/dm ² /min @ 200 Pa	DIN 53887 (Germany)
Thickness	0.040 / 1.00	inches / mms	TAPPI 411
Currugation Depth	n/a	inches / mms	TAPPI 411
MERV Rating	MERV 16		ASHRAE 52.2
Filtration Rating	Ref. F7	Up to 95% efficient at 0.3 micron at 5.33cm/sec face velocity	TSI 3160
Target Pressure Drop	< 60 pascals	Pascals at 5.33cm/sec face velocity	TSI 3160
Tensile Strength (MD)	n/a	lbs/2"	ASTM D-461
Process Data	Roll length up to 1200 linear meters. Supplied on 76mm or 3.0" ID cores		
Applications	Surgical Face Mask Applications
